

SPECIFICATION SHEET

ED-028 3m MBR Chute

DESCRIPTION:

Oceanteam Cable Solutions owns a large pool of cable handling equipment including various cable chutes of 3m and 5m MBR. The ED-028 is a flared 3m MBR chute suitable for cable transpooling and lay operations.

This chute is constructed in a single part and fitted with lift points ensuring transport flexibility. This chute can be easily installed on a vessel deck/side shell or on a tailor-made foundation via a bolting arrangement.

The chute can be fitted with entry rollers as well as sea-water lubrication fitting on request. The chute has an MBR of 3m. The entry width of the chute is 780mm.

Oceanteam can perform specific modifications to the chute based on project requirements. Additionally, Oceanteam can design and build new chutes to spec.

GENERAL SPECIFICATIONS:

MBR: 3 m

Total Footprint (l x b x h): 4.03m x 2.45m x 3.73m (excl. foundation)

Total Dry Weight: 4.5 mT

Fastening: Bolted Arrangement
