

## **SPECIFICATION SHEET**

### **ED-069 3m MBR Chute**

#### **DESCRIPTION:**

Oceanteam Cable Solutions owns a large pool of cable handling equipment including various cable chutes of 3m and 5m MBR. The ED-069 is a flared 3m MBR chute suitable for cable transpooling and lay operations.

This chute is constructed in two parts that are bolted together. This allows for easier transportation arrangements. However, the whole chute can also be transported in one piece. The chute is fitted with lift points. This chute can be easily installed on a vessel deck/side shell or on a tailor-made foundation via a bolting arrangement.

The chute can be fitted with entry rollers as well as sea-water lubrication fitting on request. The chute has an MBR of 3m. The entry width of the chute is 1500mm. Oceanteam can perform specific modifications to the chute based on project requirements. Additionally, Oceanteam can design and build new chutes to spec.

#### **GENERAL SPECIFICATIONS:**

MBR: 3 m

Total Footprint (l x b x h): 4.03m x 2.45m x 3.73m (excl. foundation)

Total Dry Weight: 3 mT

Fastening: Bolted Arrangement
